

## Special Section : Ultrafast/Ultrahigh-density Interconnect Technology for Next Generation Computers

Editorial Preface	Kazuhiko HIRAKAWA	169
1. On-chip Transmission Line Interconnect	Kazuya MASU	170
2. CMOS High-speed Interface	HirotaKa TAMURA	176
3. Leading-edge Interconnect Technology for 45nm/32nm-node ULSIs	Yoshihiro HAYASHI	183
4. Carbon Nanotube Via Technology for VLSI Interconnects	Mizuhisa NIHEI and Yuji AWANO	189
5. Silicon Photonics	Kazumi WADA	194
6. LSI Chip Optical Interconnect Technology	Keishi OHASHI, Nobuo SUZUKI, and Kenichi NISHI	201
7. On-board Optical Interconnects with Wavelength Division Multiplexing	Shogo URA and Kenji KINTAKA	207
8. Board-to-board Optical Interconnect Technology for Servers	Yoichi TAIRA	214
9. System LSI Module with Optical I/O Interfaces	Ichiro OGURA	219

## Technical Survey

Technology Trend of DRM	Hiroshi YASUDA and Takuyo KOGURE	225
Field Mining as a Methodology for Rediscovering Attractive Features in a Field	Naohiro MATSUMURA	237

## News Analysis

Development of High Power Pump without Mechanically Moving Parts Utilizing Electro Hydro Dynamics (EHD) Phenomenon : For New Driving Source of Soft Actuator in Nursing-care Equipment		245
Successful Fabrication for Superconducting Nano-structures Using Near-field Optical Writing		246
