

Special Section on Fundamental Technologies Supporting the Beauty of Image Media

Editorial Preface	Yuukou HORITA	257
1. Overview	Seiichiro HANGAI	258
2. Subjective Evaluation Technology and Human Visual System Masayuki SUGAWARA and Mitsuho YAMADA		260
3. High Quality Image Coding and Its Evaluation Technology Kenji SUGIYAMA, Osamu SUGIMOTO, and Jun OKAMOTO		267
4. Flat Panel Display Technology Taiichiro KURITA, Yasuhiro YOSHIDA, and Tetsuro NAGAKUBO		275
5. Colour Engineering for Image Quality Analysis and Assessment Toshiya NAKAGUCHI, Norimichi TSUMURA, and Yoichi MIYAKE		280
6. R&D Trends and Quality Assessment Methods in CMOS Image Sensors Takayuki HAMAMOTO and Shinichiro SAITO		287

Technical Survey

Recent Advances in Audio Source Separation Techniques Hiroshi SAWADA, Shoko ARAKI, and Shoji MAKINO		292
Quantum Computer with Superconducting Qubits : Elementary Technologies and Scaling up Yasunobu NAKAMURA		297
Development of Digital Contents Production Techniques for Bequeathing Folkloric Performing Arts in Cooperation among Industry, Academia and Local Government Hideo TAMAMOTO, Takashi YUKAWA, Takaaki KAIGA, Kazutaka MITOBE, Takeshi MIURA, and Noboru YOSHIMURA		303

Tutorial

Introduction of Halftone Visual Cryptography	Emi MYODO	309
--	-----------	-----

News Analysis

Development of Speech Translation System for Mobile Phone and PDA		313
Perpendicular Magnetization MTJ Cells for Gbits Density MRAMs		314

Technical Report

An Approach to Ubiquitous Network Society through the National Project of Large Size Liquid Crystal Display Tadahiro OHMI, Large Size LCD Project Team, and Back Light Project Team		316
