

## *Special Issue on State of the Art Network Robot*

Editorial Preface	Kazuhiko SUMI	345
<b>1.</b> Introduction to Network Robot System	Norihiro HAGITA	346
<b>2.</b> Network Robots' Future Scenario Following Computer's Roles	Miwako DOI	353
<b>3.</b> Platform Technology for Network Robots Ken-ichiro SHIMOKURA, Yukihiro NAKAMURA, and Shinyo MUTO		358
<b>4.</b> CroSSML : Service Directory Platform Enabling to Connect Multiple Domains Masayuki IWAI, Kazunori TAKASHIO, and Hideyuki TOKUDA		366
<b>5.</b> Standardization of Robotic Localization Service Shuichi NISHIO, Miwako DOI, Takashi TSUBOUCHI, and Tetsuo KOTOKU		374
<b>6.</b> Sensing and Privacy Protection of Network Robots Noboru BABAGUCHI and Shuichi NISHIO		380
<b>7.</b> Human Behavior Recognition Using a Network Robot System Keiichi KEMMOTSU, Yoshihiro KOKETSU, and Masato IEHARA		387
<b>8.</b> Human-robot Interaction in Our Daily Life Enabled by Network Robot System Takayuki KANDA		395
<b>9.</b> Development of Robotic Room 1, 2 and 3 Taketoshi MORI and Tomomasa SATO		402
<b>10.</b> Android Science Research for Bridging Humans and Robots Shuichi NISHIO and Hiroshi ISHIGURO		411
<b>11.</b> Structuring Real Environment Information for Intelligent Robots Tsutomu HASEGAWA		417
<b>12.</b> Network Robot Projects in Kansai-region Takahiro MIYASHITA		424

## News Analysis

Development of 1Gbit/s Infrared Communication Technology for Mobile Devices	431
Generation of Intense and Continuous THz Waves in High Temperature Superconductors	432
Development of Coherent Optical Transmission Technique for Tenfold Increasing in the Optical Communication Capacity	433
