

Special Section on the State of Art of Testing

Editorial Preface	Akio FUJIYOSHI	1007
1. Principles and Selected Applications of Item Response Theory	Kenji OHTOMO	1008
2. Neural Test Theory : A Test Theory for Standardizing Qualifying Tests	Kojiro SHOJIMA	1013
3. e-Testing : Advanced Testing Technology	Maomi UENO	1017
4. Universal Design of Testing	Mamoru FUJIYOSHI	1022
5. Measurement of Group Ability	Keizo NAGAOKA	1027
6. Educational Evaluation and Testing	Koyo YAMAMORI	1031
7. Automated Essay Scoring	Tsunenori ISHIOKA	1036

Technical Survey

Life on Integrated Circuits : How to Create Living Things with Electron Devices	Yoshihito AMEMIYA	1041
Ultra High-definition TV System , Super Hi-vision	Masaru KANAZAWA	1046
Relay System Based on 802.16j	Michiharu NAKAMURA and Masato OKUDA	1050
Advantages of SIP (Session Initiation Protocol) and the Case Study of Its Usage in the Operator's Network	Takuya SAWADA	1056

Lecture Series

Recent Advances and Applications on Bayesian Theory [II] : Sequential Bayesian Estimation and Data Assimilation	Kazuyuki NAKAMURA and Tomoyuki HIGUCHI	1062
---	--	------

Memoirs

YOSAMI VLF Station, the Birth Place of the First Wireless Communications between Japan and Europe , Dedicated IEEE Milestone	Kotaro TANAKA, Shoji ISHIDA, and Eiju MATSUMOTO	1068
--	---	------

Tutorial

R&D Trends of Micro Fuel Cell Systems for Portable Consumer Electronics	Kazuya AKIYAMA	1073
How to Learn a Subject out of Your Speciality : Physics for Students of Information Science	Shigeki TAKEUCHI	1076

News Analysis

Development of Normally-off GaN HEMT for Power Electronics Devices		1079
--	--	------
