

“Why I have chosen to study Electronic Engineering
– a story of a woman Engineer from Warsaw”

講演者：Prof. Janina Mazierska

日時：2005年11月10日（木）17：00－19：00

会場：パシフィコ横浜 F203 号室

<http://www.pacifico.co.jp/>

主催：IEEE MTT-S Japan Chapter Women in Engineering

協賛：IEEE Japan Council Women in Engineering

国内で活躍する女性技術者・研究者向けに、海外の著名な女性研究者を招き講演会を開催いたします。Prof. Janina Mazierska が電子工学を学び始めてから現在に至るまでの女性研究者としての歩みについて、後に続く若い女性研究者の参考になるような講演内容となっています。

受講料：無料

直接会場へお越しください。

Janina Mazierska is currently a Head of the Institute of Information Sciences and Technology at Massey University in New Zealand. Her research interests include Precise Microwave Characterisation of Low Loss Materials for Emerging Technologies and Novel Microwave Technologies and Design Techniques for Multilayer Circuits for Wireless Communications. She has co-authored over one hundred refereed publications.

Janina was elected a Fellow of IEEE for contributions to precise measurements of microwave properties of High Temperature Superconducting and dielectric materials”. She has been serving as an Editor for Microwave Applications for IEEE Transactions on Applied Superconductivity since 2001.

She has been active in the IEEE since 1987 and recently was elected an IEEE Region 10 Director for the Asia Pacific Region for 2007-2008.

Abstract

How did all these happen?

How a tall slim girl with red hair has become a University Professor in a male dominated area, one of twelve female IEEE Fellows and the world her oyster?

It was all due to one decision, taken in fact by chance, to choose Electronic Engineering as a subject of study after an incidental visit to a Faculty of Electronic Engineering at Warsaw University of Technology. This visit made her to realise she could realise her dreams of having a family and working in a stimulating environment, do novel things, travel the world and earn high salary.....

Janina's life and career can be an example for other young women to follow. She would like to extend the WIE friendship with Japan and share her experiences.
