

# 13<sup>th</sup> International Symposium on Organic Molecular Electronics (ISOME 2024)

## Invitation

The Technical Committee of Organic Molecular Electronics, Electronics Society of the Institute of Electronics, Information and Communications Engineers (IEICE) cordially invites you to participate in **13<sup>th</sup> International Symposium on Organic Molecular Electronics (ISOME 2024)**, which will be held in Advanced ICT Research Institute, National Information and Communications Technology (NICT), Kobe, Japan on **May 29 - 31, 2024**. Researchers and students who are involved in this field are heartily welcome to join lively discussion and exchange ideas on this opportunity.

## Scope and Topics

The symposium covers various aspects of organic materials that are related to electronic applications, including insulators, semiconductors, conductors, optic materials, magnetic materials, and biomaterials. Their applications extend to such fields as transistors, memories, displays, photovoltaics, optical devices, energy devices, sensors, actuators, and bioelectronics. The topics related to basic physics and chemistry, material development, process technologies, devices and applications are covered in this symposium. The ISOME 2024 aims to bring up new buds on the research of these issues.

**Date:** May 29-31, 2024

**Venue:** Advanced ICT research institute, National Institute of Information and Communications Technology (NICT) 588-2, Iwaoka, Kobe, 651-2492, Japan
