

Fourth International Workshop on Wireless Distributed Networks (WDN2011)

Call for papers

11 September 2011, Toronto, Canada

To be held in conjunction with IEEE PIMRC 2011

SCOPE:

With diversification of wireless access technologies and their application fields, the role of wireless access is no longer the last hop terminal access, but also for repeating functionality such as mesh/multi-hop/ad-hoc/sensor networking. Thereby more complicated wireless network management, especially radio resource management is required to organize the networks well as a whole. As the optimal wireless resource management based on a centralized control policy becomes difficult to implement in practice, distributed and/or cooperative control techniques should be introduced in necessary parts in any layer, such as distributed antenna, cognitive radio, distributed MAC, and dynamic heterogeneous networking. Even in a cellular system, the design of distributed control strategies becomes a key issue for realizing cooperative/coordinated MIMO and multi-hop cellular networks.

TOPIC AREAS:

The main purpose of this workshop is to systematize the academic basis over the various topics in wireless distributed networks as listed below, and to discuss the adaptability of these new technologies to enhance the performance of wireless distributed networks.

● Application

Ad-hoc network, Multi-hop network, Mesh network, Sensor network, Self-organized network, Advanced cellular network, Heterogeneous network, and Cooperative transmission system, Smart utility network, Wireless grid

● Technology

BS/AP cooperation, Cooperative sensing, Cooperative relay, Cross layer optimization, Distributed MAC, Distributed MIMO, Distributed RRM /Scheduling, Interference alignment, Network coding, Spatial spectrum sharing, Super position coding, Virtual antenna array

● Theory

Array signal processing, Bayesian network, Convex optimization, Decomposition methods, Game theory, Graph theory, Multi-dimensional Information theory

SUBMISSION GUIDELINES:

Papers should be in English, not exceeding 5 double-column (overlength pages will be charged for). and should follow IEEE paper templates. Papers need to be uploaded to the **EDAS** (<http://edas.info/N10647>). Accepted papers will be published in the IEEE Xplore and orally presented at the workshop. For more information about paper submission please visit conference web site.

IMPORTANT DATES:

- Full Paper Submission: 28 April 2011
- Acceptance Notification: 3 June 2011
- Final Camera Ready Copy: 30 June 2011
- Workshop: September 2011

Please see <http://www.icwdn.org/>
for more information about WDN 2011.

ORGANIZING COMMITTEE:

General Co-Chairs

Antti Tölli, University of Oulu, Finland
Kenta Umehayashi, TUAT, Japan

TPC Chair

Shinsuke Ibi, Osaka University, Japan

Committee Members

Koichi Adachi, I2R, Singapore
Masaki Bandai, Sophia Univ., Japan
Mats Bengtsson, Royal Institute of Tech, Sweden
Takeo Fujii, Univ. of Electro-Communications, Japan
Jyri Hämäläinen, Helsinki Univ. of Tech., Finland
Mamiko Inamori, Keio Univ., Japan
Volker Jungnickel, HHI Fraunhofer Institute, Germany
Koji Ishii, Kagawa Univ., Japan
Suguru Kameda, Tohoku Univ., Japan
Megumi Kaneko, Kyoto Univ., Japan
Kentaro Kobayashi, Nagoya Univ., Japan
Toshiaki Koike-Akino, Harvard Univ., USA
Janne Lehtomäki, Univ. of Oulu, Finland
Takeo Ohgane, Hokkaido Univ., Japan
Hiraku Okada, Nagoya Univ., Japan
Fumie Ono, Yokohama National Univ., Japan
Yasunori Owada, NICT, Japan
Kei Sakaguchi, Tokyo Institute of Tech., Japan
Seiichi Sampei, Osaka Univ., Japan
Shinya Sugiura, Toyota Central R&D Labs., Japan
Sumei Sun, I2R, Singapore
See Ho Ting, Nanyang Tech. Univ., Singapore
Hideyuki Uehara, Toyohashi Univ. of Tech., Japan
Osamu Takyu, Shinshu Univ., Japan
Li Wang, Univ. of Southampton, UK
Koji Yamamoto, Kyoto Univ., Japan
Takaya Yamazato, Nagoya Univ., Japan
