

Tokai Section, IEICE

Section Chair:

Prof. Kazuya Takeda

Graduate School of Information Science,
Nagoya University

Activities in 2014

General activities

Joint conference on electrical, electronics, information, and related engineering

Lecture meetings: tutorial of OFDM, standardization in ITU and IEC,

8K broadcasting systems, deep learning

Training course: human support robot

Excursion: DENSO corporation

Science seminar for children

Activities for students

Lecture meetings: seminar of career design,
how to read/write English papers, etc.

Student award

Presentation of graduation thesis

Seminar of career design

Activity plan in 2015

Planing new activities

Career design seminar for foreign citizenship students

Preservation activity of Yosami Radio Transmitting Station

Yosami Radio Transmitting Station was build in 1929 as one of the world's largest VLF communication facilities. Tokai Section co-operates the preservation of the station with the Chubu Society for the Industrial Heritage, etc. Yosami Radio Transmitting Station was approved as an **IEEE Milestone** in 2008, and the dedication ceremony was held in 2009.

IEEE Milestone

Yosami Radio Transmitting Station
