

Develop your possibilities at IEICE!

IEICE is a leading non-profit organization dedicated to the progress of science and technology. Our members are at the forefront of innovation, making significant contributions to society.

Share your innovative ideas in presentations, dive into research papers, and network with renowned researchers featured in the world.

Joining us is incredibly easy!

If you're intrigued, check out the details here!

Membership Benefits Include:

- Access to peer-reviewed journals and publications at *IEICE Transactions Online*
- Opportunities to present papers at international conferences
- Networking with top professionals in the field
- Discounts on our academic events and workshops
- Participation in our flagship activities
- Discounts on Article Processing Charges for IEICE Transactions (member rates)
- Email forwarding services

How to Join:

Visit our website at IEICE website; https://www.ieice.org/eng_r/join/individual_member.html
Follow the easy steps to complete your membership application today!

You can register as a **free Associate Member for a trial membership**.

We will send you the latest news through our regular newsletter, so be sure to sign up!

IEICE Multilingual Digital Library: A Groundbreaking Initiative !

Access Academic Content in Your Native Language. The IEICE Digital Library now offers multilingual access, opening doors for researchers and students worldwide to explore academic content in their native languages. <https://globals.ieice.org/>

The Institute of Electronics, Information
and Communication Engineers(IEICE)

About IEICE

Founded in 1917, The IEICE is one of the largest international academic associations, with over 21,000 members, specializing in electronics, information, communication, and related fields.

Our mission is to promote academic development as well as industrial innovation, and to foster advanced researchers. Through these efforts, IEICE contributes to building a healthy communication society and ensuring the global environmental sustainability.

The IEICE is committed to integrating diverse technical disciplines to address social challenges, pioneering new academic fields, and fostering the next generation of researchers who can create innovative visions for society and bring about paradigm shifts. To facilitate easy access to information, we offer an Associate Membership.

Societies/Group

The IEICE consists of 5 societies and 1 group.

Fields for researches and activities in each societies/group are as follows.

	Engineering Sciences Society Fundamentals of three traditional fields of electronics, information, and communications		Communications Society Communication systems, technology from basics to applications related to communication networks, and their related fields
	Electronics Society Electronics and photonics devices, and fundamental technologies		Information and Systems Society Computer and information processing, and their related fields
	NOLTA Society Research activities on nonlinear theory and its applications		Human Communication Group Interdisciplinary research on new human-centered communication engineering in telecommunications
