

## Dr Maciej Piechowiak

Kazimierz Wielki University, Bydgoszcz, Poland

### **I-Scover: From the IEICE Europe Section perspective**

**Abstract:** I-Scover (IEICE Knowledge Discovery) is an advanced searching system that process the bibliographic informations of articles published in IEICE journals and conference proceedings. It delivers IEICE's metadata on Linked Data including article, authors, organization, publication, event and terminology. IEICE Europe Section develops conference management system ConfAir (<https://confair.ieice-europe.org>), which is the only application that enables integration with I-Scover. During the speech ConfAir functionalities and features will be presented and possibilities of cooperation with the I-Scover will be discussed.

**Biography:** Dr. Maciej Piechowiak received his M.Sc. degree from the University of Technology and Life Sciences, Bydgoszcz, Poland in 2002 and his Ph.D. degree from the Poznan University of Technology, Poznan, Poland in 2010. He is currently an assistant professor in the Department of Mechanics and Applied Computer Science at the Kazimierz Wielki University, Bydgoszcz, Poland. Dr. Maciej Piechowiak is an author and co-author of dozens articles published in journals and conference proceedings (several conference awards). He has served as a Guest Editor and Editorial Board of two international journals and TPC member of several international conferences. His main research fields are: routing algorithms and protocols, optimization techniques in networks and modeling of network topologies. Dr. Maciej Piechowiak is a member of Polish Information Processing Society. He is also Cisco CCNA/CCNA Security/CCNP instructor.
