The Twelfth International Workshop on Image Media Quality and its Applications (IMQA2024) is a forum for leading researchers and developers from industry and academia to discuss state-of-the-art and novel image media quality technologies, theories, methods, and applications of quality metrics.

Scope

Topics of interest for submissions from a point of 'Image Quality' include, but are not limited to:

Image/Video Systems:

- Image Sensor, Imaging System, 3D-image Input
- Broadcasting, Video Conferencing, Video Phone, Distance Learning, Telemedicine
- Display System, 3D-Display, Holograph, Hard Copy
- Medical Imaging, Welfare System, Human-Machine Interface
- CG, CV, VR, AR, Animation

Software and Algorithms:

- Image/Video Coding (include VVC), QoS Control, Transcoder
- Security (Data Hiding, Watermarking, Individual Identification)
- Image Recognition/Reproduction/Restoration

Human Perception:

- Human Perception, Psychophysics, Color Reproduction, Sensibility Information
- Assessment Test Methodology, Objective Quality Metric
- Synergistic Effect of Image and Sound

Submission

Prospective authors are invited to submit an electronic version (using PDF) of a manuscript to review with high-quality and original research for rigorous peer review. The authors are required to select one from two paper categories: Regular paper or Position paper. The authors of accepted regular or position papers are requested to submit the final camera-ready manuscripts that will appear in the workshop proceedings.

Regular paper: **5–10 pages** for manuscript to review and camera ready paper

Position paper: **2–4 pages** for manuscript to review and camera ready paper
